

# Change DocumentRoot Directory

Dans **/etc/apache2/site-available/000-default.conf**:

```
<Directory /home/username>  
    Options Indexes FollowSymLinks  
    AllowOverride All  
    Require all granted  
</Directory>
```

On redémarre le service Apache, pour que les modifications soient prises en compte

```
sudo service apache2 restart
```
