

Add a Static IP Route To the Windows Routing Table

View The Windows Routing Table:

```
route print
```

Add route

```
route ADD destination_network MASK subnet_mask gateway_ip metric_cost  
ex: route ADD 192.168.35.0 MASK 255.255.255.0 192.168.0.2
```

Add persistent route

```
route -p ADD 192.168.35.0 MASK 255.255.255.0 192.168.0.2
```

Remove Static Route

```
route delete destination_network  
ex: route delete 192.168.35.0
```
