

WebDav HTTPS AUTOSIGNE

Procédure pour connecter un accès HTTPS WebDav configuré avec un certificat SSL Autosigné:

If you know how to do it, the mystery of strange error messages can be solved easily: You have to install your self-signed certificate first. Run Internet Explorer with administrative rights (UAC won't work!):

- * Enter your WebDAV URL
- * Click on Continue to this website (not recommended)
- * Click on Certificate Error in the red colored address bar
- * Click on View certificates
- * In the Certificate dialog, press Install Certificate
- * In the Certificate Import Wizard, click Next
- * On page 2 of the wizard, select Place all certificates in the following store and click Browse;
- * In the Select Certificate Store dialog, select Trusted Root Certification Authorities, click OK
- * In the wizard, click Next, click Finish
- * If a security message pops up, choose Yes
